

## 2017 San Antonio Post Event Report

**October 16, 2017** – Techno Security & Digital Forensics Conference wrapped up its 1<sup>st</sup> expansion edition last month after three days of education, networking and exhibits. The goal of expanding the brand to other regions within North America proved successful with attendees and sponsors alike expressing their satisfaction with the event and the desire to see it continue.

The 2017 conference program featured 68 sessions led by 72 industry experts organized under the primary tracks of Audit/Risk Management, Forensics, Investigations, Information Security, and Sponsor Demos. Session topics ranged from Dark Web, Internet of Things, Mobile Forensics, Drone Forensics, Social Media Discovery and Apps to Vehicle Forensics, The Cloud and Cyber Security Threats and Solutions as well as several new software/technology demonstrations.

The launch event welcomed more than 350 verified registrants. Participants hailed from 38 states, the District of Columbia, and from 10 different countries.

The event also featured 26 exhibiting companies which included:

AccessData; Ace Technology Partners, LLC; Arbor Networks, Inc.; Atola Technology; Cellebrite Inc.; Digital Intelligence, Inc.; ESET LLC; Forensic Computers, Inc.; Guidance Software, Inc.; HTC EDAS FOX LLC; Int'l Assn of Computer Investigative Specialists; Logicube, Inc.; Magnet Forensics Inc.; MSAB, Inc.; Naval Criminal Investigative Service; OSForensics; Oxygen Forensics; Securcube s.r.l.; Susteen, Inc.; SysTools, Inc. – MailXaminer; Tracker Products, LLC; Trittech Forensics, Inc.; Truxton; Virtual Forensic Computing (VFC); Vound Software; and Whooster.

The Techno Security & Digital Forensics Conference brand has grown into one of the most important resources for corporate network security professionals, federal, state and local law enforcement digital forensic specialists, and cybersecurity industry leaders from around the world. The purpose is to raise international awareness of developments, teaching, training, responsibilities, and ethics in the field of IT security and digital forensics.

The 2<sup>nd</sup> edition of the San Antonio, Techno Security & Digital Forensics Conference will be held September 17-19, 2018 at the Hyatt Regency. For more information please visit [www.TechnoSecurity.us](http://www.TechnoSecurity.us).

## **Testimonials:**

### ***John Graham, Director of Sales and Business Development, Atola Technology***

"We saw a fantastic combination of current customers, including some VERY important people and new prospects."

### ***Rob Gresham, Security Solutions Architect, Phantom***

"Techno Security & Digital Forensics Conference is great for folks from law enforcement/government agency and civilian/commercial security space to network and share perspectives. By bringing these two groups together, it allows each other to see the security problems from different levels."

### ***Loy Locke, Detective, San Marcos Police Department***

"It was the first Techno Security & Digital Forensics Conference (San Antonio) I attended. I was pleased with the presentations and as usual I learned something. It was also good for networking."

### ***Natasha Lockhart, VP Business Development, Systools***

"We were very impressed with the launch of Techno Security in San Antonio. We loved the location, engaged with some quality prospects, and are anxious to measure our ROI. We are looking forward to adding this to our list again next year."

### ***Miguel Miranda, Detective/Task Force Officer, Internet Crimes Against Children Unit, Metropolitan Police Department***

"For attending this conference for the first time, after always attending the ICAC conferences, the Techno Security conference is right up there with them."

### ***Harvey Nusz, PwC Contractor - GDPR Specialist and President, ISACA Greater Houston Chapter***

"This is one great conference, and in the heart of Texas! I especially liked the combination of attendees and speakers, as it mixed corporate and sole practitioners with academia, and was heavily oriented toward forensics and cyber security with an appropriate mix of audit and compliance. The vendor mix was just right, and I appreciated the allowance for and appreciation of industry associations. I had several good takeaways, both in the form of ideas to pursue, and future friendships and partnering opportunities. There were also a good number of pithy workshops where the latest ideas were exchanged and an in-depth understanding of the subject area was achieved."

### ***Sherri Wallace, Ardmore Police Department***

"There was a vast amount of information, knowledge and expertise shared freely to those of us striving to learn more about the massive growing field of technology and the barriers that we face daily. Great conference!"
